

## API USAGE

(If you want me to add more, I can its up to you what you want to show at UI)

These all are post Api's

1. <http://smartwaterwatch.mybluemix.net/auth/login>

It will take two parameters:

email, password

2. <http://smartwaterwatch.mybluemix.net/auth/signup>

It will take following parameters

first name, last name, email, password, sex. ( I am still thinking of adding an image or not)

3. <http://smartwaterwatch.mybluemix.net/api/sensor-data>

It will take two parameters

mainSensor, secondarySensors

4. <http://smartwaterwatch.mybluemix.net/api/add-sensor>

I have to make it.

NOTE: If you are testing, clone the repo and install mongo in your pc/mac and do it. When you are so sure, commit it to the Github. I will deploy it at IBM Bluemix.
