

API USAGE

(If you want me to add more, I can its up to you what you want to show at UI)

These all are post Api's

1. <http://smartwaterwatch.mybluemix.net/auth/login>

It will take two parameters:

email, password

2. <http://smartwaterwatch.mybluemix.net/auth/signup>

It will take following parameters

firstName, lastName, email, password, gender, phoneNumber.

3. <http://smartwaterwatch.mybluemix.net/api/forgot>

It will take following parameters

email

4. <http://smartwaterwatch.mybluemix.net/sensor/register>

It will take following parameters

sensorName, serialNo, sensorType, mainSensor (if sensor you are registering is
Secondary Sensor)

5. <http://smartwaterwatch.mybluemix.net/sensor/activate>

It will take following parameters

serialNo

It will give you sensorId you have use it to get Data

6. <http://smartwaterwatch.mybluemix.net/sensor/data>

It will take following parameters

sensorId

7. <http://smartwaterwatch.mybluemix.net/sensor/data:sensorId>

It's a get api.

NOTE: If you are testing, clone the repo and install mongo in your pc/mac and do it. When you are so sure, commit it to the Github. I will deploy it at IBM Bluemix.
